ESGAR Calendar 2020 54
Other related events 2020 55
Dear members of ESGAR, dear colleagues,

I proudly present you the ESGAR Annual Report. ESGAR has grown into a well-established society with now over 2380 members from 79 countries.

This year marked the 30th Anniversary of ESGAR. The scene set to celebrate this could not have been more ideal, the 30th ESGAR Annual Meeting held in the beautiful city of Rome. It was a successful meeting and a memorable celebration. Thanks to our host and Meeting President Prof. Andrea Laghi.

Our next destination is ESGAR 2020 which will take place from May 19 – 22, in Amsterdam, The Netherlands. It will again be a highly interesting scientific programme, which I’m sure will attract many ESGAR friends and abdominal radiologists. The Meeting President, Prof. Jaap Stoker, and I are excited to welcoming you to ESGAR 2020 in our hometown Amsterdam.

For the coming years my focus for ESGAR will be “multidisciplinarity, outreach, Young ESGAR, and ESGAR research”. You will find many ESGAR activities evolving around these themes.

We will strengthen “multidisciplinarity” in our educational programmes. It is my belief that we can only become good if we interact with our clinical partners and understand their questions. Multidisciplinary education is key to reach this goal. We have formalised collaboration with clinical societies, such as the ESCP (European Society of Coloproctology), EASL (European Association for the Study of the Liver), ESDO (European Society of Digestive Oncology), EPC (European Pancreatic Club), ESP (European Society of Pathology), EDS (European Digestive Surgery) and ECCO (European Crohn’s and Colitis Organisation). Together we are working out a strategic plan for multidisciplinary education where the emphasis will lie on teaching by and interaction with teachers from various disciplines. Do not miss these opportunities and join our workshops.

We will reach out to countries further away from Europe to disseminate subspecialty knowledge. As a first initiative, we will organise jointly with ARGANZ the Liver Workshop in Brisbane, Australia.

To all young ESGAR fans; join the new Young ESGAR group and respond to the recent call that we posted on social media and sent out via a newsletter. The Amsterdam ESGAR 2020 meeting will mark the official launch of the new Young ESGAR group. Apart from the opportunity to make your work visible to an international forum of peers, you will also have the chance to network and socialise with young ESGAR members from around the world. Amsterdam is a vibrant city especially for the young. We will make sure that also this part is being taken good care of.
Research is one of the main pillars in our society. Without research our subspecialty would not evolve. The amount of scientific abstracts we received for the ESGAR 2020 Annual Meeting is an indication that we have many ambitious scientists among us. ESGAR's Research Committee is working hard on a programme for the coming years and you will hear soon from them about important projects that will improve the quality of abdominal radiology practice.

I am excited to see so many projects running successfully and new projects being launched in our growing society. This is only possible through the hard work of many committed ESGAR members.

At the end of this year I would like to express my gratitude....

To my predecessors, our distinguished ESGAR leaders; thank you for giving me the opportunity to lead ESGAR and contribute to its future. If I could have seen into ESGAR's future it is because I have stood on your shoulders.

To all ESGAR fellows and faculty; thank you for your commitment to ESGAR in committees, meetings and courses. It's because of your excellent contribution that our subspecialty continues to develop.

To the ESGAR office, Brigitte Lindbauer and her team; thank you for your office support in all ESGAR activities. Professional, efficient and enjoyable!

To the ESGAR Executive Committee; Your devotion and leadership are truly inspirational. Thank you for being by my side. I’m looking forward to continuing our journey together and working for our society.

To all of you, ESGAR members; thank you for your loyalty to ESGAR. I wish you and your family all the best for a happy and successful 2020!

Sincerely, your president,

Regina Beets-Tan
December 2019
Annual Meeting
The ESGAR Annual Meeting, the Society’s most important event, is held in a different European country each year.

**THE ESGAR ANNUAL MEETING**

- has become the largest and most prestigious GI and abdominal radiology meeting worldwide
- has become a global meeting
- is attracting more than 1500 radiologists, physicians, researchers and academics from around the world
- has become a platform for personal and scientific exchange
- offers high standard education and scientific content and is the best place to learn about the latest advances in the fields of gastrointestinal and abdominal radiology

### ANNUAL MEETING 2019

#### 30th ESGAR Annual Meeting and Postgraduate Course

June 5 – 8, 2019 | Rome, Italy

#### ESGAR 2019 MEETING PRESIDENT

Prof. Andrea Laghi  
Rome, Italy

#### CONFERENCE VENUE

La Nuvola – “The Cloud”  
Viale Asia 40  
IT – 00144 Rome

### IMPORTANT FACTS

- 1683 participants from 63 countries worldwide attended the meeting
- 1 Postgraduate Course:  
  A tour around abdominal emergencies
- 36 ESGAR Tutorials
- 14 Scientific Sessions
- 10 Lecture Sessions including a Joint Session with ESUR (European Society of Urogenital Radiology) and ECCO (European Crohn’s and Colitis Organisation)
- 3 Interventional Radiology Sessions
- 2 Foundation Courses
- 2 Poster Sessions
- 2 Tricky Cases from my Day Job Sessions
- 1 Clinical Files Session
- 1 One Case Three Lessons Session
- 1 Research Centre Session
- 1 Editorial Session: “From submission to publication - all you want to know from our Editors in-Chief”
- > School of ESGAR
- > Ultrasound Village
- > Interventional Hands-on Workshops
- > Undergraduate Programme
- > ESGAR Honorary Fellows 2019:  
  Michael Laniado, Dresden/DE; Judy Yee, New York, NY/US
- > ASAR (Asian Society of Abdominal Radiology) Honorary Lecturer: K.-L. Liu, Taipei/TW
- > ESGAR Honorary Lecturer: Y. Gandon, Rennes/FR
- > SAR (Society of Abdominal Radiology) Honorary Lecturer: E.M. Remer, Cleveland, OH/US
- 7 Lunch Symposia organised by: Bayer AG, Bracco, Canon, GE Healthcare, Guerbet, Philips and Siemens
- 2 Industry Satellite Workshops
- 15 Exhibitors

The ESGAR Programme Committee takes great pleasure in congratulating the “ESGAR Top 20” authors. The “ESGAR Top 20” are the best rated abstracts, submitted by residents, who appear as the first author on the respective abstract and actually presented their oral presentation during the Annual Meeting in Rome, Italy:

Mehmet Aksakal, Ankara/TR
Roberto Cannella, Palermo/IT
Giuseppe Cardano, Verona/IT
Uli Fehrenbach, Berlin/DE
Hanyu Jiang, Chengdu/CN
Georgios Kaissis, Munich/DE
Federica Landolfi, Rome/IT
Elena Lucertini, Rome/IT
Cesare Maino, Monza/IT
Andrea Mazzaro, Verona/IT
Wouter Mebis, Edegem/BE
Anna Pecorelli, Monza/IT
Adrien Saifi, Brussels/BE
Khoschy Schawkat, Boston, MA/US
Jennifer Tang, Melbourne, VIC/AU
Marcello Andrea Tipaldi, Rome/IT
Simone Vicini, Latina/IT
Zheng Ye, Chengdu/CN
Marta Zerunian, Rome/IT
Fei Zhu, Chengdu/CN

The abstracts of scientific oral presentations are published in “Insights into Imaging”:

You can also find the “Book of Abstracts” in your Personal ESGAR Account via www.esgar.org.
The ESGAR Programme Committee is delighted to express their congratulations to the “Poster Presentation Prize” winners. Two Magna Cum Laude, four Cum Laude, and nine Certificates of Merit have been awarded. The evaluation of the e-Poster presentations was completed in advance of the meeting by a jury and was based on novelty, accuracy, educational value and design:

**MAGNA CUM LAUDE**
- Varsha Halai, Portsmouth/UK
- Rachita Khot, Charlottesville, VA/US

**CUM LAUDE**
- Davide Bencardino, Rome/IT
- Yong Li Chin, Singapore/SG
- Binit Sureka, Jodhpur/IN
- Sudhakar Venkatesh, Rochester, MN/US

**CERTIFICATES OF MERIT**
- Tanya Chawla, Toronto, ON/CA
- David DiSantis, Jacksonville, FL/US
- Ryan Downey, Omaha, NE/US
- Silvia Greco, Palermo/IT
- Edwin Ho, Sydney, NSW/AU
- Tae Kyoung Kim, Toronto, ON/CA
- Ana Primitivo, Loures/PT
- Isabel Puig, L’Hospitalet de Llobregat/ES
- Felipe Ribeiro Ferreira, São Paulo/BR

Electronic Poster  Highlighted Lecture  Journal Watch
Case of the Month  Vintage Case

... any time, any day.
Different cases were displayed each day throughout the Annual Meeting, thus giving registrants the opportunity to take part in the quiz and check the results on the following day.

The coordinator of the ESGAR 2019 Cases of the Day competition was Prof. Ahmed Ba-Ssalamah, Vienna/AT.

The following participants solved most cases correctly:

**FIRST PLACE**
Stephen Esler, Melbourne, VIC/AU
Amir Reza Radmard, Tehran/IR
Felipe Ribeiro Ferreira, São Paulo/BR
Rosemanda Zakhary, Melbourne, VIC/AU
Janneke Houwers, Maastricht/NL

**SECOND PLACE**
Alette Daniels-Gooszen, Eindhoven/NL
Christophe Balliauw, Hasselt/BE
Carlos Bilreiro, Lisbon/PT

**THIRD PLACE**
Meric Tuzun, Ankara/TR
Alison Page, Birmingham/UK
Gennady Sheynkman, Jerusalem/IL
Christophe Constantin, Sion/CH
Giovanni De Luca, Parma/IT
Bram Eijlers, The Hague/NL
On the occasion of the ESGAR 2019 Annual Meeting in Rome, the following “European Radiology ESGAR Awards 2018” were presented.

The articles were chosen by the jury from among 38 papers published by ESGAR Members (at least one author must be a member of ESGAR) in the journal “European Radiology” during the calendar year 2018.

The jury was composed of the following persons: the President of ESGAR (S. Halligan), President-Elect (R. Beets-Tan), Vice-President / President of the Annual Meeting (A. Laghi), Chairman of the Education Committee (S. Jackson), 2019 Programme Committee Chairmen (C. Matos/ M. Zins) and the European Radiology Editor in Chief (Y. Menu).

GOLD AWARD
Lapo Sali, Silvia Delsanto, Daniela Sacchetto, Loredana Correale, Massimo Falchini, Andrea Ferraris, Giovanni Gandini, Giulia Grazzini, Franco Iafrate, Gabriella Iussich, Lia Morra, Andrea Laghi, Mario Mascalchi, Daniele Regge

for publishing the paper with the title “Computer-based self-training for CT colonography with and without CAD”

SILVER AWARD
Kieran G Foley, Robert K. Hills, Beatrice Berthon, Christopher Marshall, Craig Parkinson, Wyn G. Lewis, Tom D. L. Crosby, Emiliano Spezi, Stuart Ashley Roberts

for publishing the paper with the title “Development and validation of a prognostic model incorporating texture analysis derived from standardised segmentation of PET in patients with oesophageal cancer”

BRONZE AWARD
Davide Bellini, Domenico De Santis, Damiano Caruso, Marco Rengo, Riccardo Ferrari, Tommaso Biondi, Andrea Laghi

for publishing the paper with the title “Bowel preparation in CT colonography: Is diet restriction necessary? A randomised trial (DIETSAN)”
Your online education resource, just one click away – any time, any day!

The ESGAR e-Education Portal aims at facilitating web-based learning for ESGAR Members and delivering high quality educational material in the fields of gastrointestinal and abdominal radiology. The platform reflects and builds on the longstanding aims of the Society. One of the major features of the e-Education Portal is the recorded content from the ESGAR Annual Meetings. Other elements include the Case of the Month, e-Posters, and the Vintage Case kindly provided by Dr. Alan H. Freeman.

All content is regularly checked and updated.
CASE OF THE MONTH
Participate in the challenge and try to solve the case!

RECORDED CONTENT
The recorded lectures from previous Annual Meetings are available online all year round for congress participants and ESGAR members.

HIGHLIGHTED LECTURE
Lectures from the recent Annual Meeting, selected by the Education Committee Chair based on speaker score and topic relevance, are featured monthly!

VINTAGE CASE
The ESGAR Vintage Case gives you the opportunity to test your skills by interpreting plain radiographs of the abdomen!

JOURNAL WATCH
An online source for clinical commentary and review of topical research papers provided monthly by younger radiologists.

E-POSTER ARCHIVE
The online e-Poster Database includes over 2000 educational and scientific exhibits from ESGAR 2004 – 2017!

E-POSTERS
All e-Posters from ESGAR 2018 onwards are displayed here!

ESGAR 2019 – AWARDED POSTERS
Find out more about the awarded e-Posters from the recent Annual Meeting!

Responsible for the content: Education Committee
TECHNICAL WORKSHOPS

are educational activities focused on imaging modalities or specific techniques. These workshops aim to provide practical skills and information, using different teaching formats: lectures, panel discussions and hands-on training using workstations.

CLINICAL WORKSHOPS

are targeted to specific organs or disease pathways and are approached from a clinical perspective. An integrated multimodality approach offering comprehensive coverage of the topic with radiological-pathological correlation is central to the learning experience. The workshop format includes didactic lectures as well as interactive discussions on real clinical cases.

MULTIDISCIPLINARY WORKSHOPS

cover a gap in educational experience and address the spectrum of gastrointestinal diseases in a multidisciplinary approach specifically for a varied audience including radiologists, surgeons and gastroenterologists. Clinicians must understand the imaging used in daily practice in order to guide patient treatment. In addition radiologists must also appreciate the important clinically relevant questions in order to provide useful information that will subsequently impact on treatment decision making.

In 2019, ESGAR continued offering courses that have proven to be successful (Liver, Pancreas, CT colonography, Acute Abdomen and Junior Summer School) and to expand its range by proposing new initiatives. Together with European Society of Coloproctology (ESCP) ESGAR organised multidisciplinary course on GI tract tumour. Attendees had the opportunity to learn about new imaging methods, the clinically relevant questions and how the answers impact on treatment decision making in oesophageal and bowel cancer. Another joint workshop in cooperation with EPC (European Pancreatic Club) was organised in 2019. This multidisciplinary course gave an overview on an integrated approach of imaging in the diagnosis, management and treatment of pancreatic diseases. Moreover, due to a high demand, ESGAR has again held 2 editions of MR Imaging of Rectal Cancer workshops in 2019. And finally, ESGAR has successfully developed new course programmes for the case-based liver and pancreas workshops which were held at the SFR Learning Centre.
Workshops offer a great educational value to Society members. Highly qualified teaching faculties, interesting topics, cutting-edge programmes, and attractive locations are only some of the reasons why our attendees thoroughly enjoy the courses. After the first workshop was organised in 2003, 98 courses have followed, focusing not only on the colon, but also the liver, pancreas and on other areas of the GI tract.

So far, more than 6150 radiologists have been trained and feedback has always been extremely positive. Looking back at 2019, the programme with the organisation of 12 workshops and the Summer School and the participation of more than 550 attendees has been successful. In addition to the traditional workshops, ESGAR has successfully developed the case-based liver and pancreas workshops at the SFR Learning Centre in Paris.

Due to the increasingly varied topics it has become necessary to re-think the ESGAR workshop framework, in order to avoid overlapping topics as well as potential confusion amongst attendees. Thus education content has been restructured along three different and clear lines: technical, clinical and multidisciplinary workshops. This is not simply a theoretical differentiation, but also reflects the varied content and educational approach used during the workshops as well as defines the delegates experience required to maximise learning opportunities.

I. Santiago, Lisbon/PT
F. Vernuccio, Palermo/IT
“This summer I took part in the ESGAR Summer School in Malta. I must admit that at first I was puzzled, but I couldn’t be more wrong! It was outstanding! I found it extremely interesting both from an educational and research point of view and a very enjoyable experience from a recreational point of view (they organized guided excursions and a boat trip). We prepared and discussed many tricky clinical cases with the participants and the professors; we also had very accurate and up-to-date lectures. Last but not least, I had the opportunity to meet many fellow-friends from different countries with whom I could exchange opinions and both work and non-work experiences. I will definitely recommend JESS to all my colleagues and would like to thank the professors and all the team for organizing such a fantastic week for us.”
- Francesca Castagnoli, Brescia/IT

“The ESGAR Summer School was the perfect mix of a radiology crash course in abdominal imaging and a summer vacation on a beautiful island of Gozo. Perfect for residents or newly specialised radiologists who practise abdominal imaging. The participants were radiology residents from other parts of Europe and it was so interesting and funny to talk about our daily radiology training and lifestyle in different countries. Presentations and specific cases covered all kind of pathologies as well as the faculty lectures. The social programme was great, covering all kind of activities - perfect to make new friends from other parts of Europe! Great experience!”
- Matko Gulin, Zagreb/HR

“I was fortunate enough to attend the Junior ESGAR summer school 2019 and could not have hoped for a more beautiful setting on the island of Gozo, Malta. The excellent committee had organised a wide range of case based sessions across gastrointestinal and abdominal imaging topics presented by an expert faculty. We then worked as teams each day to crack our case and present our opinion to the rest of the group which allowed for much creativity! Each day was concluded with fun social activities including a tour of city, dinner and even a boat trip. One of the highlights was meeting so many other radiology trainees with an interest in abdominal imaging and I have made a number of friends who I plan to keep in touch with, hopefully at future ESGAR events. I would thoroughly recommend JESS to those considering applying.”
- Maira Hameed, London/UK

Young ESGAR (YE) is an exciting new initiative to promote active participation of young ESGAR members within the vibrant ESGAR community.

Young ESGAR was initiated in 2019 and is currently coordinated by 4 young radiologists, who are also representing Young ESGAR as delegates in the Educational, Membership, Research and Workshop Committees. Young ESGAR is advised by Prof. Michael Laniado, Dresden/DE and the chairs of the four committees:

**Damiano Caruso (Educational Committee):**
Damiano completed his Radiology residency in 2016 at Sapienza University of Rome, after a 1 year research fellowship at MUSC - Medical University of South Carolina, Charleston, SC, USA, with a special interest in cardiovascular imaging and abdominal Dual-Energy CT. Since then he worked as a staff radiologist at Sant’ Andrea University Hospital, Sapienza University of Rome. He’s involved in scientific activities focusing his interest in abdominal and oncologic imaging. Damiano already served as Chairman of the young radiologist committee of the ESOI (European Society of Oncologic imaging). He is an ESGAR member since 2010 and joined the Educational Committee in 2019.

**Doenja Lambregts (research committee):**
Doenja finished her Radiology residency program at Maastricht UMC+ in 2016 and has since then worked as a staff radiologist specialized in abdominal oncologic imaging at the Antoni van Leeuwenhoek - Netherlands Cancer Institute in Amsterdam. She has been an active member of ESGAR since 2009, became an ESGAR fellow in 2015 and joined the research committee in 2017. Doenja was previously part of the educational committee where she helped set up the “ESGAR journal watch”. She finished her thesis on “novel MRI techniques in rectal cancer” in 2013 and is still actively involved in research on multiparametric imaging in rectal cancer as well as in other tumour types.

**Casper Mihl (workshop committee):**
Casper completed his Radiology training in 2016, followed by a fellowship in abdominal radiology at Maastricht UMC+. As of 2016, he works as a radiologist (and head of the CT department) at Maastricht UMC+ with a special focus on abdominal and cardiovascular radiology. In 2016, Casper completed his thesis "decisive modification tools in coronary computed tomographic angiography; from phantom to patient". His primary emphasis in research is focused on the optimization of scan and contrast media injection protocols in CT. He became an ESGAR fellow and joined the ESGAR workshop committee in 2019.
Cäcilia Reiner (membership committee):
Cäcilia obtained her medical degree at the Medical University of Vienna and afterwards joined the Radiology residency program at the University Hospital Zurich. After finishing the residency training in 2011, she became a research fellow in abdominal imaging at Duke University Medical Center in North Carolina (USA). Since then she pursued her interest in abdominal research with a special focus on tumor perfusion imaging, hepatobiliary and pelvic floor MRI. She returned to the University Hospital Zurich as a staff radiologist in 2012, where she became a senior staff member in 2017 responsible for abdominal imaging and the MRI division. Cäcilia is an active member of ESGAR since 2008 and ESGAR fellow since 2017. She joined the ESGAR membership committee in 2019.

The main goal of Young ESGAR is to generate a forum of enthusiastic young ESGAR members to represent the interests of young residents, radiologists and researchers within the ESGAR community. We aim to create an informal and interactive platform to network, exchange ideas and to promote active participation.

And of course we cannot do this alone!
Are you:

• A junior radiologist, resident or radiology researcher (preferably <40 years of age)?
• Full of ideas on how young ESGAR members can become more involved in our community?
• Keen to share your ideas and help shape the future of ESGAR?

Then send a short email expressing your interest to youngESGAR@esgar.org

Please attach a brief CV and a short (1-3 bullet points) description of what you would like to contribute to Young ESGAR.

We hope to see all of you at the ESGAR Annual Meeting from May 19 – 22, 2020 in Amsterdam, where you should take the chance to visit and meet us at the Young ESGAR Office!

Best wishes,

Cäcilia, Casper, Damiano and Doenja

ESGAR is pleased to announce the newly elected Fellows approved at the General Assembly during ESGAR 2019. Fellows are active members, for at least 3 years, who have made a significant contribution to Abdominal and Gastrointestinal Radiology and related research areas. A Fellow should be involved in daily practice or teaching or research, predominantly in this field.

ESGAR is responsible for delivering a high quality of education in gastrointestinal and abdominal radiology. The increasing number of attendees at the ESGAR Annual Meetings and Workshops indicates that there is a growing need for subspecialised education and recognition in gastrointestinal radiology.

Eventually, ESGAR offers the “ESGAR Certificates of Subspecialty Recognition”. These certificates offer a recognition at European level for radiologists who have reached a subspecialised level of knowledge and who are keen to maintain this level in abdominal radiology, actively involved in abdominal radiology practice as well as in education and research.

The ESGAR Certificates of Subspecialty Recognition Programme includes two levels:

ESGAR Certificate of Distinction (Level I) and Certificate of Excellence (Level II). The certificate is given for a period of five years. After five years, the certificate can be renewed if provided criteria and requirements have been fulfilled.

ESGAR Members certified with Level II can be selected to become ESGAR Fellows after the proposal of the Executive Committee.

Who is eligible?

Level I – ESGAR Certificate of Distinction: ESGAR Members (active, corresponding) fulfilling the threshold according to the scoring system of at least 15 points.

Level II – ESGAR Certificate of Excellence: ESGAR Members (active, corresponding) fulfilling the threshold according to the scoring system of at least 40 points.

In 2019, ESGAR has received 18 applications from the following countries:

- Chile/India
- The Netherlands
- Belgium/Brazil/Greece/Sweden/Switzerland
- Italy
- 5 ESGAR Certificates of Distinction in Abdominal Radiology (Level I)
- 13 ESGAR Certificates of Excellence in Abdominal Radiology (Level 2)
The Society is indebted to its National representatives who play a most important role by providing a point of contact and advice in each of the represented countries of Europe and beyond. They encourage members to consult them on any matter relevant to the Society.

EXECUTIVE SUMMARY
Promoting and supporting abdominal imaging research is a major goal of the ESGAR Research Committee. To facilitate the ESGAR membership in this endeavour, the committee has developed proposals for an ESGAR Research Mentorship Programme, ESGAR Grant and ESGAR Research Fellowship (to be decided on). For ESGAR 2020, three research tutorials will be introduced linked to the proposed Mentorship Programme. Further, the Opening Lecture is about how society and medical professionals look at the evaluation of medical tests. Guideline development is a continuing activity, with the first year that the ESGAR guideline development document is used. An inventory made clear that ESGAR guidelines are well read and cited.

Research development: ESGAR Research Mentorship
The Research Committee has developed an ESGAR Research Mentorship. The mentorship is aimed at junior members that have begun their academic career. Senior ESGAR researchers will be linked to junior members based on the specific demand of the junior (e.g. mentoring for scientific career development, increasing methodology expertise, grant application).

Only junior researchers who have signed in for and attended all research tutorials at the ESGAR Annual Meeting can apply for this Mentoring Programme. Applicants (ESGAR members) will be asked to provide a curriculum vitae, a letter of motivation to attend this programme and a letter of recommendation/reference from an academic sponsor/mentor at their home institution. The maximum number of applicants will be 15. More details will be provided on the website.

Research development: ESGAR Research Grant and ESGAR Research Fellowship
The Research Committee has made a proposal for ESGAR Research Grants and for an ESGAR Research Fellowship. Details will be presented in 2020 on the website and in an ESGAR newsletter.

Research development: ESGAR 2020
During ESGAR 2020 there will be three research tutorials dedicated to important aspects of imaging research.

P.M.M. Bossuyt “Study Designs for Imaging Trials”
S. Halligan “How to get a grant”
A. Plumb/D. Lambregts “How to get abstracts and papers published”

The Opening Lecture of ESGAR 2020 will be dedicated to imaging research. In his presentation “The evaluation of medical tests: From results to consequences” Prof. Patrick Bossuyt -world-leading expert in the field of methodology of test evaluation- will explain how society and medical professionals look at evaluation of medical tests.
Research development: joined efforts in research development in European radiology societies

The ESGAR Research Committee has proposed to the ESR Research Committee to join forces to come to a common research development plan for all European radiological societies. The chair of the ESGAR Research Committee has been asked to coordinate the development of such a pan European collaborative effort, starting in 2020.

Guidelines
Each guideline that was published in the last years is downloaded thousands of times while guidelines are cited up to 250 citations.

The status of the ESGAR guideline development was per December 2019:

**PUBLISHED GUIDELINES**
- ECCO-ESGAR Guideline for Diagnostic Assessment in IBD (J. Stoker)

**FINALISED GUIDELINES**
- UEG Achalasia Guideline (A. Plumb)
- UEG Chronic Mesenteric Ischemia (C. Zech)

**ONGOING GUIDELINES**
- Monodisciplinary guideline with SAR Quantification diffuse liver diseases (L. Martí-Bonmatí). Almost finalised.
- Monodisciplinary: ESGAR/ESUR CT technique in acute abdomen (M. Zins). In progress.
- UEG guideline on IgG4-related GI diseases (C. Matos, N. Kartalis)

The newly published ESGAR guideline development document has been introduced in the development of the guidelines that started in 2019.

**ESGAR Research Committee**
C. Zech, A. Perez Girbes and D. Bellini left the ESGAR Research Committee due to other commitments. They are very much thanked for their contributions to the work of the committee.

S. Gourtsoyianni joined the committee. Further, in 2020 Young ESGAR will be involved in the Research Committee.

For further information and download of the guidelines kindly visit the ESGAR Website
The trend towards increasing subspecialisation led the European Society of Gastrointestinal and Abdominal Radiology (ESGAR), supported by the European Society of Radiology (ESR) and the European School of Radiology (ESOR), to take the initiative in establishing an exchange programme for fellowships or subspecialisation training in abdominal imaging.

The programme offers the opportunity to complement subspecialisation training in abdominal imaging or an existing structured fellowship programme, through exchange, in this field of radiology. The three-month exchange programme will provide an intense modular training in all areas of abdominal imaging, including conventional radiology and fluoroscopy, sonography, CT, MRI and image-guided biopsies and therapeutic interventions.

The exchange programme is organised through ESOR and exposes trainees to all aspects of abdominal imaging under the supervision of an assigned mentor who is Fellow Member of ESGAR, in a pre-selected European reference training centre.

**ESGAR/ESOR EXCHANGE PROGRAMME**

Trainee: Martina Caruso (Federico II University Hospital, Naples/IT)
Topic: Abdominal Imaging
Training Centre: Champalimaud Foundation, Lisbon/PT

“I am very grateful to ESOR and ESGAR for giving me the opportunity to spend three months at the Champalimaud Foundation in Lisbon for the Abdominal Radiology research program. It has been an unforgettable life and learning experience, that I absolutely suggest to all my colleagues. A special thanks to my tutor, Prof. Celso Matos, and his fantastic team who warmly welcomed me since the beginning, involved me in the department life and shared their up-to-date knowledge. During this period, I had the opportunity to attend the weekly multidisciplinary meetings and reporting activity, in this way I deepened my knowledge about hepatobiliary-pancreatic diseases and colon-rectal cancer in a very stimulating environment.”
Trainee: Imre Csemez (National Institute of Oncology, Budapest/HU)
Topic: Abdominal Radiology
Training Centre: Pitié-Salpêtrière University Hospital, Paris/FR

“First of all, I am terribly grateful to ESOR and ESGAR for awarding me with this great opportunity. I am currently undergoing a three-month exchange programme fellowship on the topic of abdominal radiology at the Pitié-Salpêtrière University Hospital, which is a renowned center in the heart of Paris. I would like to express my gratitude to the entire staff of the department, especially Prof. Olivier Lucidarme and Dr. Mathilde Wagner for giving me a warm welcome and involving me in their daily activities. I have attended multidisciplinary boards and teaching sessions with an emphasis on oncological radiology. Besides learning new skills in hepatobiliary imaging, I have also managed to extend my knowledge in the field of rectum and prostate imaging. Moreover, Paris is one of the most beautiful and exciting cities in the world, which also contributes to the unforgettable experience.”

Trainee: Mohamed Adel Abdelatty Elsayed (Cairo University Hospitals, Cairo/EG)
Topic: Abdominal Radiology
Training Centre: University College London Hospital - Centre for Medical Imaging, London/UK

“As a firm believer in the necessity of exchange of knowledge and expertise for the sake of continuous improvement, I was thrilled to be chosen to participate in the ESOR/ESGAR exchange program fellowship for the year 2019. I cannot begin to describe how fruitful those three months of practice at University College London Hospital were in terms of pursuing my goal to specialize in abdominal imaging. Through the remarkable support of my dear tutors Prof. Steve Halligan and Dr. Andrew Plumb, I was exposed to various cases of different imaging modalities that altered my understanding of colorectal cancer staging, inflammatory bowel diseases, perianal diseases as well as pelvic floor dysfunctions. In addition to the comprehensive analysis of CT Colonography with Dr. Plumb and the numerous MDT meetings I have attended which truly advanced my clinical and radiological proficiency. It was a tremendous experience and I am forever grateful to ESOR, ESR and ESGAR as well as the abdominal radiology consultants at UCLH for this once in a lifetime opportunity.”
Aleksandra Jankovic (Clinic for Digestive Surgery, Belgrade/RS)
Abdominal Imaging
Netherlands Cancer Institute - Antoni van Leeuwenhoek, Amsterdam/NL

“I am very honored to get this unique opportunity to learn and work in this respectable hospital for three months. I’m thankful to ESOR for the chance to improve my experience in different oncological areas, in the field of research as well as in clinics. It was certainly one of the most precious experiences in my professional life. I would like to express my gratitude to Professor Regina Beets-Tan and all her team made of experienced and brilliant radiologists, with profound thanks to my mentors Dr. Doenja Lambregts and Dr. Annemarie Bruining for their time and knowledge they have unselfishly shared with me. I would also like to mention the great PhD team, with the individuals always ready to help, with special thanks to Lisa Anna Min for the huge support in different everyday situations. At the end, I have to say that Amsterdam is an extraordinary place and one of the most beautiful cities with the great energy, and from now on, it will have a special place in my heart.”

Taha Yusuf Kuzan (Sancaktepe Education and Research Hospital, Istanbul/Turkey)
Abdominal Imaging
European Institute of Oncology, Milan/IT

“I am very grateful to ESR/ESOR and ESGAR for giving me the chance to participate in a three-month fellowship on abdominal radiology in one of the leading oncology institute in Italy. During this period, I was able to participate in all activities of the department: multidisciplinary meetings, radiology reporting of all modalities and educational lectures. As this institute is regarded as an oncology center, I had a chance to gain my knowledge and skills in subspecialties such as neuroendocrine tumor imaging, whole-body MRI and multiparametric prostate MRI. I am very appreciative of my tutor Dr. Luigi Funicelli, and the remaining members of the radiology team for their support during the fellowship.”
ESGAR activities within UEG (United European Gastroenterology) rely on the continuous work of nominated delegates representing the Society:

- UEG Education Committee: C. Zech, Basel/CH
- UEG Meeting of Members: M.A. Bali/BE, A. Laghi, Rome/IT, J. Stoker, Amsterdam/NL
- UEG Scientific Committee: G. Brancatelli, Palermo/IT
- YOUNG UEG: D. Lambregts, Amsterdam/NL

**UEG Education Committee**

The UEG educational activities continue to reflect the long-term strategy for promoting multidisciplinary education of all Federation members. The Education Committee facilitates this aim by overseeing and funding innovative educational courses developed by member Societies.

ESGAR has initiated on this platform 4 multidisciplinary workshops for 2020. These include cooperation with the European Society of Coloproctology (ESCP), the European Digestive Surgery (EDS), the European Pancreatic Club (EPC) and the European Society of Digestive Oncology (ESDO). Although this time we have not been able to receive grant funding from UEG, we are happy to have overall increased and strengthened the collaboration with other UEG societies working on abdominal and GI medicine.

As a future concept, the UEG education committee has initiated a new level of collaboration for educational events with the “masterclass” concept. This will aim to not only enable collaboration between two societies but involve all societies which represent the clinical work-up of a certain abdominal or GI disease, involving clinical signs, endoscopy, imaging, surgery, medical treatment as well as pathology. We hope that this new approach, which is scheduled to start 2021, will also be of high interest for our members.

From 2019 on Prof. Christoph J. Zech, Basel/CH has been our nominated ESGAR representative on the Education Committee.

**UEG Meeting of Members**

The UEG Meeting of Members was held in Barcelona, Spain, on October 20, 2019 and was chaired for the last time by the outgoing UEG President Paul Fockens.

ESGAR was represented on the occasion by Prof. Jaap Stoker, Prof. Maria Antonietta Bali and Prof. Andrea Laghi.

As usual the President presented the current UEG Week statistics pointing out the record number of participants (more than 4,000) who attended the Postgraduate Teaching Programme and the overall number of delegates which exceeded 13,000 participants. Although 63% were Europeans, as many as 21% were Asians.
The Secretary General, Magnus Simrén reported on the activities of various boards and committees, which included the first joint committee meeting, where representatives from all of UEG’s committees met to exchange ideas, discuss the Strategic Plan and reinforce their collaborations. Among the activities of the other committees, it is worth mentioning the effort to improve the quality of education, both live, during the UEG Week, and online, using the web portal. Extremely important it was also the publication in 2019 of a position paper on digestive health, analysing the socioeconomic burden of digestive diseases, and the presentation of the Manifesto on digestive health on the occasion of EU elections, re-launching the Digestive Health Group at the EU Parliament. UEG has also worked to favour young talents, through a mentoring programme, and to promote equality and diversity, with the first women networking event organised during the UEG Week 2019. And last, but not least, the success of UEG Journal, which reached an impact factor of 3.453 should be highlighted.

During this meeting, the board position of Vice-President underwent election and after two rounds of voting, the winner was Helena Cortez-Pinto.

Another important decision was the inclusion, after positive voting, of the Egyptian Association for Research and Training in Hepato-Gastroenterology (EARTH) among the National Member Societies of UEG.

Before the end of the meeting the treasurer reported the excellent financial condition of the Society, with a revenue 13% higher than budgeted.

At the end of the Meeting Axel Dignass, UEG President-elect, took the opportunity to thank Paul Fockens and express his appreciation for his skilful leadership as UEG President. The date of the next Meeting of Members will be October 11, 2020, during UEG Week 2020 in Amsterdam, The Netherlands.

**UEG Scientific Committee**

The Scientific Committee, entrusted with developing the core programme of UEG Week, is composed of a truly multidisciplinary group of the most renowned scientists and researchers in the field of gastroenterology and meets four times a year. Through close collaboration and constant communication with the UEG Secretariat, a high-quality programme was again created for the 2019 meeting that was held in Barcelona, an event that attracted delegates from 122 countries with more than 4000 abstracts submitted. ESGAR members were involved as speakers and moderators in several sessions, with diverse topics such as hepatocellular carcinoma, large bowel obstruction, assessment of complete response after chemoradiotherapy in rectal cancer, complications of Crohn’s disease, imaging pancreatic collections, pancreatic cancer. The next UEGW meeting will be held in Amsterdam from October 10 – 14, 2020. In 2019 Prof. Giuseppe Brancatelli has replaced Prof. Stuart Taylor as ESGAR delegate in the Scientific Committee and will hold this position for four years.
ESGAR REPRESENTATIVES IN ESR COMMITTEES

Education Committee
D. Tolan, Leeds/UK

Quality, Safety and Standards Committee
N. Kartalis, Stockholm/SE

Research Committee
J. Stoker, Amsterdam/NL

Subspecialties & Allied Sciences Committee
S. Halligan, London/UK

Many fellows and members of ESGAR are also represented on an individual basis within the ESR organisation. Amongst others:

ECR 2019 SCIENTIFIC SUBCOMMITTEES

Chairpersons:
G. Brancatelli, Palermo/IT
S. Schmidt Kobbe, Lausanne/CH

ABDOMINAL VISCERA

Members
R. Albazaz, Leeds/UK
A. Blachar, Tel Aviv/IL
A. Cieszanowski, Warsaw/PL
N.A. Courcoutsakis, Alexandroupolis/GR
T. Denecke, Berlin/DE
E. Dresen, Leuven/BE
M.M. França, Porto/PT
N. Kartalis, Stockholm/SE
E.G. Klompenhouwer, Eindhoven/NL
C.S. Reiner, Zurich/CH
M. Ronot, Clichy/FR
A. Torregrosa Andrés, Valencia/ES

GI TRACT

Members
L. Blomqvist, Stockholm/SE
S.M. Ertürk, Istanbul/TR
G.G. Karmazanovsky, Moscow/RU
S. Kinner, Essen/DE
M.J. Lahaye, Amsterdam/NL
A.J.B.S. Madureira, Porto/PT
D.E. Malone, Dublin/IE
M. Radzina, Riga/LV
H. Ringl, Vienna/AT
G.A. Rollandi, Genoa/IT
D. Tolan, Leeds/UK
M. Zappa, Clichy/FR

ECR 2020 Scientific Subcommittee Chairpersons (SCCH)
Abdominal Viscera
T.C. Lauenstein, Düsseldorf/DE

GI Tract
L.K. Blomqvist, Stockholm/SE

ECR 2021 Scientific Subcommittee Chairpersons (SCCH)
Abdominal Viscera
C.J. Zech, Basel/CH

GI Tract
A. Torregrosa Andrés, Valencia/ES
ESGAR AND OTHER SOCIETIES

ESGAR AND SOCIAL MEDIA

ESGAR maintains an active presence on four main social media sites: Facebook, Twitter, Instagram and LinkedIn. These accounts are updated throughout the year by the central ESGAR office and ESGAR social media advocates. New posts are usually published on multiple platforms simultaneously and are a convenient way to keep up to date with new announcements, courses and conference deadlines, and also to contact the ESGAR team.

Here is a summary of the various platforms (data correct as of 14th November 2019).

**Instagram**
@esgarsociety joined Instagram in December 2017 and has steadily grown with 633 followers (increase from 240 in 2018). Our posts reached 2,050 people in the last 28 days.

**Twitter**
@esgarsociety joined Twitter in April 2016 and has 403 followers (increase from 183 in 2018). Over the last 28 days posts reached 11,900 people which is very positive given the lower number of followers relative to Facebook and Instagram.

**Facebook**
@esgarsociety joined Facebook in November 2015 and has the largest number of followers at 1,774 (increase from 1,437 in 2018) with posts reaching 3,214 people in the last 28 days. The page was viewed 195 times over the same period.

**LinkedIn**
@esgarsociety joined LinkedIn in 2017 and has 205 followers (increase from 81 in 2018). We strongly encourage you add ESGAR to your personal LinkedIn profile as a company you are involved in, and link to our page.

In 2020 we are looking to post more educational content and ‘case of the day’ style posts and also involve the young ESGAR initiative to help us develop our social media strategy.
If you would like to get involved, share good practice or would like to post relevant content to our members, please contact us via any of the social media sites.

Christopher Clarke, Nottingham/UK
